DATASHEET

CORE-SB-HS

Barrier Tape - High Voltage, Danger to Life

Techpro CORE-SB-HS is a durable, clearly visible warning tape designed for temporary cordoning and marking of areas with electrical hazards. It is particularly suitable for work near high-voltage installations, cable installations, trenching works, construction sites and other hazardous areas where clear warnings are required.

The tape is made from heavy-duty PE film with high visibility, clear text and an internationally recognised electrical hazard symbol.

Applications

- High-voltage installations
- Cable trenches and infrastructure projects
- Temporary safety cordons
- Contracting work
- Industrial areas
- Building and civil engineering sites

Features and benefits

- High visibility in outdoor and construction areas
- Heavy-duty material with good tear resistance
- UV-resistant for outdoor use
- Clear Norwegian warning text
- Easy to unroll and handle
- Professional solution for the energy and contracting sectors
