FLOW-ERS-Adaptor

Adapter system for Extendable Roller Support

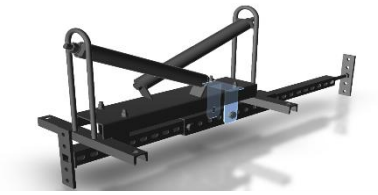

Techpro FLOW-ERS-Adaptor is designed for safe, flexible mounting of rollers on FLOW-ERS-1600 during cable installation in culverts, tunnels and other cable routes.

The adapter system allows different FLOW rollers to be mounted on FLOW-ERS-1600, providing a stable, robust solution for cable installation in demanding conditions. The adapters are designed for quick mounting, flexibility and optimal compatibility with FLOW-series products.

FLOW-ERS-Adaptor supports safe, efficient, cable-friendly installation, while adapting easily to different installation methods and cable routes.

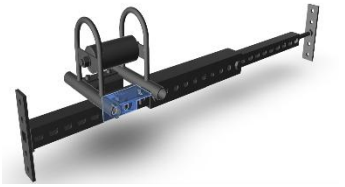

Key data

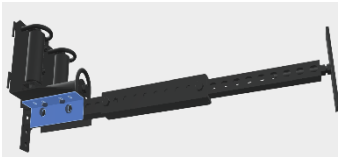

- Adapter system for FLOW-ERS-1600
- Fits several FLOW-series roller types
- Robust, stable construction
- Easy, flexible mounting
- Hot-dip galvanised steel (HDG)
- Suitable for demanding environments

Features and benefits

- Flexible adaptation to different roller types
- Stable mounting of rollers and installation equipment
- Easy assembly and disassembly
- Robust construction for demanding use
- Optimised for use with FLOW-ERS-1600
- Suitable for culverts, tunnels and cable routes

Technical specifications						
Product	**Compatible roller**	**Material**	**Finish**	**HDG**	**Weight (kg)**	**Dimensions (L x H x W, mm)**
FLOW Adaptor CCR	FLOW CCR	Steel	HDG	~80 µm	~ 1kg	~ 320 x 110 x 3
FLOW Adaptor CR	FLOW CR	Steel	HDG	~80 µm	~ 1kg	~ 300 x 80 x 80
